Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

- a. The abstract of the disclosure is objected to because it is too long and uses phrases that can be implied (e.g. "Disclosed is an..."). Correction is required. See MPEP § 608.01(b).

- b. The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

- c. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in the Republic of Korea on February 17, 2003. It is noted, however, that applicant has not filed a certified copy of the foreign application as required by 35 U.S.C. 119(b).

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. Claims 1-5 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

Although there are numerous multi-chambered pump dispensers with valves to regulate the ratio of the contents to be dispensed, the prior art of record does not disclose or suggest, in combination with the other limitations set forth in claim 1, a circular connecting member being disposed between an inner highest portion of the lower case and the inner lower portion of the upper case, with the discharge tubes extending from the first and the second chambers through an inside of the connecting member into the upper case, with the highest upper free ends of the discharge tubes being inserted into a body of a discharge-quantity control part disposed at an internal center portion of the upper case, and a valve being rotatably disposed between the highest upper free ends of the discharge tubes within the body, wherein the valve is integrally connected with a dial disposed between the valve and the circular connecting member in such a manner as to operate together with the dial, and the valve selectively opens or closes the highest upper ends of the discharge tubes by receiving a driving force from the dial.

Art Unit: 3754

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lawrence et al., Proctor, Corba et al., Favre, Cataneo et al., and Prueter disclose similar multi-chambered pump dispensers with selection valves.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Keasel whose telephone number is (571) 272-4929. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Mar can be reached on (571) 272-4906. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
